

LOCKERS

For the 2008-2009 school year, locker availability will be severely limited due to the construction taking place throughout the year. For the Fall semester, the 5000 Building lockers will not be available. A limited number of lockers are available for student use **at the student's own risk in the 1000, 2000 and 7000 buildings.** Lockers will be chosen on a first come/first find basis **only on the day you are assigned to pick up your program.** All locks will be removed on the evening/morning prior to the first program-pick up day. **Each afternoon locks that were not purchased at CV will be removed.** On the day students pick up their program, they may place a lock on any locker of their choice.

Due to the locker shortage this year, students are encouraged to share a locker with one other student. Please carefully consider whether or not you need a locker before placing a lock. We find that many seniors choose just the right locker and then never use it. Given the shortage, please do not “waste” the locker space.

Students **must** purchase combination locks from the school. Locks purchased at Rosemont are NOT acceptable. Students who purchased combination locks from C.V.H.S. last year may continue to use those locks. This requirement is in the interest of both student safety and locker accessibility. Locks will be sold for \$8.00 each in the ASB room from **8:00 A.M. to 10 A.M.** the day you are assigned to pick up your program. After classes begin, locks may be purchased only at snack and lunch in the Student Store. **Locks other than those sold at C.V.H.S. will be removed from lockers** and any textbooks will be returned to the book room.

Anything taken from a locker will be the responsibility of the student. **This includes textbooks.** The administration reserves the right to open a locker or remove a lock at any time. **Students are reminded not to place articles of value in lockers.** Students should always make sure that locks and lockers are secure before walking away.
